

10 Year Summary									
1992	1993	1994	1995	1996	1997	1998	1999	200	2001
32,743	31,677	30,142	28,870	29,468	32,301	33,841	31,819	29,925	28,620

	Q1	Q2	Q3	Q4	Average
2001	29,304	29,518	28,263	27,419	28,620
2002	27,529	28,663	28,107	29,041	28,338

The number of sentenced inmates continued to decline for the fourth consecutive year since hitting its peak in 1998. The non-sentenced population rise may also dramatically increase the average length of stay, resulting in more early releases of sentenced inmates, and overtaxing the existing jail alternative programs. It can be implied that the decline in sentenced population is equivalent to the increase in the non-sentenced populations.
